

## List of papers

The bibliographic search was conducted on the EconLit database. The first search included all English written articles or book chapters that contained the words “reallocation” and “transition”. After deleting false positives, theoretical papers and articles from which flow values could not be recover or where non-comparable, we were left with 13 papers. We complemented the bibliographic search with a snowball search, where we looked at the bibliography of the 13 selected papers to discover other articles that might have gone unnoticed in the first stage. As a result of this search, we included 5 additional papers.

Below, we include the list of papers used in the analysis together with the link to the original publication and the reference number to link the estimates to the database.
